

DeLaval udder towel UT507

The UT507 is a very effective towel; though low in weight and volume, it has an excellent absorption capacity. This compact towel can absorb up to 10 times its own weight! The perforation in the UT507 allows dirt and straw to be removed from the teat easily and stick to the towel.

This synthetic blue towel has a size of 34 x 37 cm, the fabric weight is 80 g/m² and it can be washed at 95°C. One pack contains 25 towels.
